Objective

B.Com graduate with strong accounting knowledge and hands-on skills in Tally ERP9, SQL, Excel, Power BI, and Python. Seeking a data analytics role where I can apply my analytical abilities and commerce background to support accurate reporting and business decision-making.

Skills

Programming & Querying: SQL, Python

Data Visualization Tools: Excel, Power BI, Matplotlib, Seaborn

Accounting & Commerce Skills: Tally ERP9, Financial Statement Review, Journal Entries, Ledger Management, GST Basics, Bank Reconciliation

Core Areas: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Review, Insight Reporting, Business Reporting, MIS Reporting

Experience

Data Entry Operator / Cashier / Customer Service Assistant

2024 - 2025

Venkatesh Steels Pvt. Ltd.

- Entered and managed customer, inventory, and financial data with high accuracy and speed, ensuring error-free records.
- Handled daily cash transactions, generated bills, maintained receipts, and balanced accounts at the end of each day.
- Provided prompt and friendly customer support by resolving inquiries and maintaining high client satisfaction.
- Organized records, updated documentation, and supported workflow improvements to enhance operational efficiency.

Data Analyst Intern

2025 – Present

Apponix Technologies, Hubballi — Dataview Analytics (Remote)

Tools Used: Excel, SQL, Power BI, Python

- Processed and validated datasets exceeding 50,000+ records to identify patterns and summarize key metrics.
- Built Power BI and Excel dashboards to clearly display performance, customer insights, and sales results.
- Created analytical summaries and automated scripts using SQL and Python, reducing manual reporting time by 30%.
- Improved decision-making by presenting insights and collaborating with multiple departments.

Projects

Restaurant Sales Insights | *Python, Power BI, Excel*

- Analyzed 10,000+ restaurant orders to identify customer trends, high-performing items, and seasonal demand.
- Developed dashboards using Power BI and DAX to monitor KPIs and visualize sales patterns.
- Automated data preparation using Python (Pandas), improving accuracy and reducing manual efforts by 25%.

LaLiga Performance Analysis | *Python, SQL, Tableau*

- Analyzed multiple seasons of LaLiga data to compare team performance, scoring efficiency, and possession trends.
- Built Tableau dashboards to visualize performance metrics and team comparisons.
- Identified tactical differences and consistency factors contributing to team success.

Patient Health Monitoring | *Python, Power BI, Plotly, Seaborn*

- Developed a patient monitoring system to track vital signs and detect irregularities using Python.
- Created Power BI dashboards that reduced manual review time by 40%.
- Improved data quality through streamlined preprocessing and visualization workflows.

Certifications

- Deloitte Australia – Data Analytics Virtual Internship
- IBM – Data Fundamentals

Education

Bachelor of Commerce (B.Com)

Graduated: 2023

Kumud Ben Darbar College, Vijayapur — Rani Channamma University, Belagavi

CGPA: 7.88 / 10
